HUNT Cloud network opening form

The aim of this request form is to clarify responsibilities and document outbound data traffic initiated inside the following HUNT Cloud Lab:

LAB NAME:

LAB LEADER:

As a Lab leader, I hereby request the following network opening for data transfers initiated inside my Lab:

REMOTE PARTY:

Specify the institution responsible for the remote machine and the country where the remote machine resides.

NETWORK:

Specify the public IPv4 address for the remote machine.

Port number.

DURATION:

Specify the termination date of the opening or state if the opening is permanent.

PURPOSE:

Specify the purpose of the opening, and if traffic will include personal data.

Personal data (Y/N).

TRANSFER APPROVALS. I hereby confirm that the purpose of the data transfer and the location of the remote machine is in compliance with my data approvals.

TRANSFER AGREEMENTS. I hereby confirm that the required documentation between my host institution and the remote party is in place, such as a data processor agreement if transfers will include personal data.

TRANSFER AUTHORIZATION. I hereby confirm that I am authorized to request the above network opening on behalf om my host institution, and that I am aware that all users in my lab can transfer data over this opening.

TRANSFER LOGS. I am aware that the amount of data transfered over the opening is logged and that this information may be subject to audits from my data controller and other data authorities.

PLACE/DATE:

LAB LEADER:

Send a signed copy of this agreement to **cloud@hunt.ntnu.no** and read more on \textcolor{ntnublue}{\textbf{\href{https://

transfers}}} to get started.
